

An overview of Daz Products and Features

Creativity Unleashed

Daz 3D is an expert in the 3D content space. With our free 3D software suite, one of the largest 3D marketplaces, and content that can go anywhere we allow artists to unleash their creativity with ease regardless of their software preference.

About Daz

Daz 3D is a leader in NFT strategy, marketing & full-stack development, including generative PFP collections. The company has worked with iconic brands like Warner Brothers, Champion, Coca-Cola, Louis Moinet, and others to create cross-chain NFT collections and wearables for the metaverse. In 2021, it partnered with RTFKT (now Nike) to bring 3D utility to CloneX, and Daz dropped Non-Fungible People, the first of several PFP projects for Daz in 2022.

Daz 3D offers proprietary avatar technology and its free-to-use 3D modeling software, Daz Studio, which has been used by millions of people worldwide. This powerful combination allows artists to create high-resolution stills and animations in 3D scenes and its digital marketplace showcases tens of thousands of products with more than 5 million cross-compatible 3D assets.
